Overview

IZONE is a comprehensive Egyptian system, specifically designed to meet the needs of the Egyptian labor market.

It offers user-friendly features that enhance interaction between employees and departments within the organization.

Additionally, it is fully informed on Egyptian labor laws, taxes, and insurance, On the human resources side it is fully integrated with the accounting system, so all requests and expenses are recorded, allowing easy access to generate detailed profit and loss reports, which enhance in-depth visibility for administrative decision-making that supports the company's success.

3 Main Features

Web Based

Multicurrency

Bilingual
